Subject: RE: Malathion: FMC Commitment Letter Question

Thanks for your help on this Eric. I'm going to push back on EFED and see what they'd actually need in a commitment letter. Clearly though they didn't consider this one by the foreword in the appendix 1-5 I sent you.

Subject: RE: Malathion: FMC Commitment Letter Question

We had a meeting with them to talk about their agreement to change some stuff to help with the ESA assessment, but I never received a commitment letter before I left.

It looks like in the letter in your email they are responding to my (attached) summary of what clarifications were requested as a result of that meeting. That's pretty close to a commitment letter...

Eric,

I wanted to pass this question along to you as well as I realized you might, by chance, have it in your emails as well. See attached email.

Subject: Malathion: FMC Commitment Letter Question

Avivah,

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

Do you happen to remember, or have in your emails from 2015-2016, any record of them having submitted such a letter or discussion of preparing one? This would have been just before I took over malathion. More detail is listed in the appendix 1-5 [attached and addressed to you] which includes FMC's correspondence on this.

Any information you can provide on this would be greatly appreciated. If you can't locate anything, we will just reach out to FMC. Thank you for your help!
